KCNC MACHINE

REMOTE CNC PROGRAMMING / PROJECT MANAGEMENT

KCNC Machine provides remote CNC programming, CAD/CAM, and manufacturing support for machine shops that need additional programming capacity without adding another full-time programmer. Whether your shop is facing a programming backlog, increased production demand, employee absence, new work, or recurring overflow, KCNC Machine can function as an extension of your existing manufacturing team.

Led by a degreed Computerized Manufacturing & Machining professional with more than 10 years of hands-on CNC machining and programming experience, KCNC delivers production-focused programming, detailed setup documentation, revisions, and responsive technical support remotely.

CORE CAPABILITIES

- Blueprint → CAD Modelling
- 3-Axis & 5-Axis CNC programming
- Prototype-to-production programming
- Toolpath, cut time & tool wear optimization
- Custom fixture and soft jaw modeling / programming for rigid part holding
- Detailed setup sheets & tool lists
- On-call support for revisions
- Project management approach and coordination with material purchaser and machine operator
- Technical documentation
- G-code provided w/ d numbers for operators to modify
- G-code provided w/ op-stops and program stops (with notes) at critical dimensions for operator to control tolerance
- 3D printing & prototype support
- Tool crib → Tool library coordination
- Laser Engraving (small pieces)

Certifications

- **Professional Certificate:** Project Management.
- **Associate's Degree** Computerized Manufacturing and Machining

Machine and Controle Experience

Haas / Okuma / DMG Mori / FANUC-controlled equipment

Programming Examples

Professional Liability Insurance

Certificate of Insurance available upon request

MONTHLY - QUARTERLY - ONGOING CONTRACT
